

## CDNVRau4-60 Universal 4-output active splitter - for 60 mm electrical box

Universal distributor with active video amplifiers for digital systems. It enables connection of four receivers or separation of the main bus into four independent outputs. It is also possible to connect another distributor or terminate the bus. The maximum distance between the receiver and the distributor is 70m. Mounted on floors, at the installation's assembly point or at the bus distribution point. Module without housing for installation in a Ø60 mm electrical box. Compatible with digital devices from groups: CDNP, Inspiro, Familio P/PV and COMO PRO/PRO-A.

<b>Index</b>	CDNVRau4 - 60
<b>Description</b>	Active splitter without housing
<b>Material</b>	Plastic housing (underside)
<b>Dimensions (mm)</b>	50x50x18
<b>Installation type</b>	Digital: twisted pair cat. 5e or 6
<b>Power supply</b>	15VDC / 50 mA
<b>Stand-by power consumption</b>	~0,8W
<b>Outputs</b>	ARK screw connectors: 8 x connection of the video output signal: V+ and V-
<b>Inputs</b>	ARK screw connections: - 2 x power connection - 2 x connection of the input video signal: IN V+ and IN V-
<b>Attributes</b>	<ul style="list-style-type: none"> <li>- the possibility of increasing the distance up to 300m with the use of additional power supplies for receivers</li> <li>- connection of up to 4 receivers</li> <li>- Splitting the video signal into 4 independent outputs</li> <li>- distance to receiver: max 70 m (with appropriate system configuration)</li> <li>- Possibility to work as a through or final manifold (built-in video terminator with jumper)</li> <li>- power supply and operating status of the distributor</li> </ul>
