

Set up Instructions for Video Doorbell and Camera

For use with
DB101, DB301, CAM200A, CAM400, CAM1200

1. Download  the Amalock App from the App store and register.
2. Open the back of the doorbell with the screwdriver supplied and remove the tabs from the base of each battery and place back inside of unit ensuring connection. *(Not required for the CAM200A, CAM400 or CAM1200)*
3. The device will now say **'The camera is now ready for pairing'** whilst the push button is flashing blue.
4. Open the Amalock app and tap the **'+'** at the top right.
5. For CAM200A, CAM400 or CAM1200 Select **'Video and Surveillance'**
6. For DB101, DB301 Select **'Smart Doorbell'**
7. At the bottom of the screen tap on the circle next to the text 'Make sure the indicator.....' to show an orange tick.
8. Tap **'Next'**
9. Add your Wi-Fi password
10. Show the barcode to the device as shown.
11. When you hear a bleep the device and phone will pair.
12. To name the device tap on the pen symbol.
13. Tap **'Done'** and your phone will then show you live video streaming

For 2-way Audio.

1. The device is default set to one-way talk, so tap on the 'pen' symbol top right to take you to settings.
2. Tap **'Basic Function Settings'** then tap **'Talk Mode'** to change to Two-Way Talk.

For PIR motion adjustment

1. Go to Advanced Settings and tap **'PIR'** to adjust to Low, Medium, High or Off as desired

To Pair the Indoor Chime (Not required for CAM200A, CAM400 and CAM1200)

1. Plug into 3 Pin socket and the device will play the default ring tone once at the maximum volume.
2. Select from the various chimes using the up and down selector on the left side then press and hold in the volume control button for about 5 seconds until you here a single "ding". The pairing mode will be in pairing mode for 8 seconds.
3. Press the doorbell button twice to pair.
4. Both devices are now paired.
5. To adjust the volume, short press in the top button until desired volume is reached.

Fitting the backplate (Not required for CAM200A, CAM400 and CAM1200)

Ensure not to break the locating lugs when sliding the doorbell on the fixing plate.

(We cannot accept responsibility for damage caused by installer)

To prevent theft of the doorbell, ensure you secure the doorbell to the fixing plate at the base using the security screws supplied with the allen key

Share device

- > Go to **'Others'** in settings
- > Select **'Share Device'**
- > Select **'Add Sharing'**
- > Enter the other user email or mobile number once the other user has downloaded and registered. The other user will be added automatically.

Recordings

FAQ....

- Q.** How many other users can I add to the camera?
- A.** You can add up to 20 other users.
- Q.** Can I plug in the indoor chime to any room in the house?
- A.** Yes, the doorbell will connect to the indoor chime within the same household.
- Q.** How many indoor chimes can I have connected to the doorbell?
- A.** You can have unlimited amount within the same household.
- Q.** Can I have more than 1 doorbell connected to the app? For example, the front door and a tradesman entrance?
- A.** Yes, you can have an unlimited amount.
- Q.** How long before I get a notification after the doorbell button is pressed?
- A.** Typically it will be around 1-2 seconds. A delay will occur if your Wi-Fi or 4G signal is weak. If you're on 4G, then a delay to the notification will occur but should be within 4-5 seconds.
- Should a problem persist, then contact your provider to check your Wi-Fi speed and signal strength.
- Q.** How many devices can I have connected on my mobile?
- A.** You can have an unlimited amount.
- Q.** What size SD card is supplied within the device?
- A.** It will be fitted with a 16G memory SD card.
