

PS45-15-PRO-13 Power supply with video splitter for Familio PRO system

Power supply with built-in video splitter for up to 3 monitors, dedicated for Familio PRO system. Can be used in one, two, or three family buildings, to power the entire video intercom system. Compatible with other ACO video systems. It can be connected with RJ-45 connectors or alternatively with ARK screw connectors. Reliability, innovation and durability are the hallmarks of the ACO brand.

Index	PS45-15-PRO-13
Description	DC power supply with integrated video splitter
Dimensions (mm)	109x92x59 (6 x DIN modules)
Mounting	DIN rail or surface
Installation type	Digital: twisted pair cable cat. 5e or 6
Current	3A
Voltage	Input: 100-240VAC, 1A 50/60Hz Output: 15VDC
Outputs	ARK screw connections: 15V DC, GND, Line, 3 x video (differential) 3 x RJ45 for connecting monitors
Inputs	ARK screw connections: 230V (PE, L, N), Video IN (differential) 1 x RJ45 for connecting the PRO panel (without power supply to the electric strike)
Attributes	<ul style="list-style-type: none"> - connection of 3 monitors at a distance of max. 70m (cat. 5e) - Main input from panel or other ACO standard source - possibility to connect the panel directly at a distance of max. 100m (cat. 5e, without power supply to the electric strike) - possibility of powering the electric strike (only ARK screw terminals) - has built-in active video amplifiers - compatible with other ACO video systems - can be connected with RJ-45 or ARK screw connectors
